Our parents, La Salle University,
The teachers who were our guides
During the major and helped us
In the development of this project.
ABSTRACT

This research project is focused in the development of a proposal in which is used cooperative learning as a strategy that might help at fourth grade students at La Candelaria School to start writing. Besides, it is used some essential elements of cooperative learning as positive interdependence in which students must be conscious that they sink or swim together into the teamwork; the second one is face to face interaction where pupils have to work together, sharing resources, helping, supporting each other’s to reach a common goal.

This project is carried out into four stages which are: Student context, student knowledge, cooperative learning and writing and assessment. Moreover, this document shows all the tools used through the research process such as surveys, test, lesson plans, guides, activities and so on, which helped to clarify and establish easier the veracity of the problem.
INTRODUCTION

La Candelaria School is a public institution, which attends students from pre-school to eleven grades that do not have enough resources. In addition, the community offers an educational project emphatically in communication and living together to generate environments participative and democratic.

The development of this project is of significant importance, first of all because it is pretended to make use of cooperative learning to start writing in fourth grade students. Second, due to the influence of different elements such as; positive interdependence and face to face interaction, which are essential in order that students do real work and must recognize that their role is very important in the success of their group to reach the common aim, reason why in the course of this project, at fourth grade students at La Candelaria School were given a set of activities and guides to gather information about if Cooperative learning could be a good strategy to start writing.

Because of that, the theoretical framework is based upon Cooperative Learning, its elements and Writing. It is expected that these theoretical references allow to do an study that could help through cooperative learning start writing in those students.

There are different definitions of cooperative learning but only one will be used because is the most appropriate theory to develop this project; Johnsons and Johnsons (1982), in which “cooperative learning is the instructional use of small groups so that students work together to maximize their own and each other’s learning”.
1. RESEARCH THEME

In the course of this research, it is going to be developed cooperative learning and their elements Positive interdependence and face-to-face interaction as a main theme; According to Johnson and Johnson (1982), in which “cooperative learning is the instructional use of small groups so that students work together to maximize their own and each other’s learning”\(^1\) besides, students can improve their relationships and interact better with others.

2. COOPERATIVE LEARNING AS A STRATEGY TO START WRITING IN FOURTH GRADE STUDENTS AT LA CANDELARIA SCHOOL
3. PROBLEM

The focus of La Candelaria School is to promote the development of competent students’ holders of active and productive mind that work the knowledge, from their previous ideas and those that the environment offers.

The Curriculum of this community is constructing collectively which basis will be the significant construction of the knowledge through the cognitive and affective process, with emphasis in living together, communication and a projection towards the artistic and cultural.

Based on the above, and taking into account the observations done so far and guides applied in the classroom, it is noticed that students of fourth grade have low English level, and during the practice the main problem was writing.

For this reason, it is our purpose to set a proposal based on cooperative learning through which students might get to start writing and make use of it, where students work in team, sharing interests, using a variety of activities and guides to encourage them to write.

Finally, it is our main interest to take advantage of this strategy in order to answer the following question: *How to make use of cooperative learning to start writing, in fourth grade students at La Candelaria School?*
4. BACKGROUND

General background

Improving Social Skills through the Use of Cooperative Learning (ED496112)

Author(s):
Dollman, Lucinda; Morgan, Catherine; Pergler, Jennifer; Russell, William; Watts, Jennifer

Pub Type(s):
Dissertations/Theses; Tests/Questionnaires

Abstract:

The purpose of this action research project is to improve student social skills through the use of cooperative learning, in order to develop a positive classroom environment that is conducive to learning. The action research project will involve approximately 95 students, 95 parents, and 200 teachers. It is the intent of the teacher researchers to improve students' social skills through the following strategies: role-playing, jigsaw, think-pair-share, and graphic organizers. This study will be conducted for twelve consecutive weeks (from October 2, 2006 to December 18, 2006) in the 2006 fall semester. The teacher researchers hope that improved social skills will create a positive learning environment that will benefit all students. It has been a common complaint among teachers, parents, and administrators that far too much valuable time in the classroom is consumed by disciplinary measures. The teacher researchers agree with research that has shown the need for disciplinary measures is the result of acquisition deficits (student does not know the skill), performance deficits (student knows how to
perform the skill, but fails to do so), fluency deficits (student knows how to perform skill, but demonstrates inadequate performance), and internal/external factors (negative motivation or depression) (NASP, retrieved 2006). Each week the instruction will involve a mini-lesson. The skill is taught on Mondays. Tuesday through Thursday during at least two lessons students will work in cooperative groups where they will have the opportunity to practice the skill taught on Monday.

On Fridays students will reflect on the week's activities. The first two weeks will focus on active listening. The third and fourth weeks will focus on students staying on-task. The fifth and sixth weeks will focus on problem solving. Possible strategies that will be used throughout the six-week documentation period will include think-pair-share (discussions among pairs of students), jig-sawing (used to gather a lot of information in a short amount of time by dividing tasks among group members), role playing (acting out the social skills), and graphic organizers (t-charts, concept maps, KWL, and the fishbone). Researchers have advocated the implementation and use of cooperative learning in order to increase student achievement and social skills development (Siegel, 2005). With the implementation of cooperative learning strategies, these teacher researchers hope to improve the social skills of their students. Appended are: (1) Teacher Observation Checklist; (2) Teacher Survey; (3) School-Wide Faculty Survey; (4) Student Survey; and (5) Parent Survey. (Contains 36 figures.) Does Cooperative Learning Belong in the College Writing Classroom?

Author(s):
Nowlin, Barry R.; Amare, Nicole E.
Pub Type(s):
Reports - Research
Abstract:
This study, which was primarily experimental in nature, sought to determine whether cooperative argumentative writing, in contrast to competitive individual writing, has positive effects on student performance and attitudes. A brief qualitative analysis using student questionnaires, journals, and interviews (n=73) was conducted to assess students' attitudes toward cooperative learning. Using analysis of covariance as a statistical measure, the study determined that freshman college students write as well in a cooperative group environment as they do individually. The results also indicate that by using cooperative groups to write argumentatively, cooperative learning can become a valuable pedagogical tool when integrated into the college writing classroom. Although these qualitative data reveal that students respond somewhat negatively to certain aspects of cooperative learning, their attitudes did not impede the quality of their writing, and many acknowledge that the overall experience was positive.

Estándares Básicos de Competencias en Lenguas Extranjeras: inglés

De acuerdo al documento del Ministerio de Educación Nacional "Con el fin de mejorar la calidad del sistema educativo y con miras a adecuarlo a las exigencias actuales y futuras del país, el Ministerio de Educación Nacional define y socializa estándares para todos los niveles de la educación, de manera que los propósitos del sistema educativo se unifiquen en forma coherente. Así, inicialmente se formularon los estándares básicos de competencia en lengua, matemáticas, ciencias naturales, ciencias sociales y ciudadanas. A este grupo de estándares se suman los Estándares Básicos de Competencias en Lenguas Extranjeras: inglés, los cuales adicionalmente contribuyen a que los estudiantes colombianos se preparen para afrontar las exigencias del mundo globalizado".

"Los Estándares de Competencia en Lengua Extranjera: Inglés, al igual que los estándares para otras áreas, constituyen “criterios claros y públicos que permiten establecer cuáles son los niveles básicos de calidad a los que tienen derecho los niños y las niñas de todas las regiones de Colombia”. Con ellos, estamos
diciéndole a la comunidad educativa y a los padres de familia, qué es lo que los niños y niñas deben aprender al final de cada grupo de niveles y qué deben ser capaces de hacer con eso que aprendieron, para que puedan desenvolverse de manera efectiva en el mundo estudiantil y laboral.\(^2\)

**Algunos conceptos clave en el Programa Nacional de Bilingüismo**

De acuerdo al documento del Ministerio de Educación Nacional “La lengua extranjera, es aquella que no se habla en el ambiente inmediato y local, pues las condiciones sociales cotidianas no requieren su uso permanente para la comunicación.

Una lengua extranjera se puede aprender principalmente en el aula y, por lo general, el estudiante está expuesto al idioma durante períodos controlados. A pesar de no ser usada en circunstancias diferentes a las académicas, los estudiantes de una lengua extranjera pueden alcanzar altos niveles de desempeño para ser comunicadores eficientes cuando así lo requieran.\(^3\)

En el contexto colombiano y para los alcances de esta propuesta, el inglés tiene carácter de lengua extranjera. Dada su importancia como lengua universal, el Ministerio de Educación ha establecido dentro de su política mejorar la calidad de la enseñanza del inglés, permitiendo mejores niveles de desempeño en este idioma.

**¿Por qué enseñar inglés en Colombia?**

“El mundo actual se caracteriza por la comunicación intercultural, por el creciente ritmo de los avances científicos y tecnológicos y por los procesos de

\(^3\) Ibid.
internacionalización. Estas circunstancias plantean la necesidad de un idioma común que le permita a la sociedad internacional acceder a este nuevo mundo globalizado”4

La educación permite el desarrollo humano y ofrece respuestas a los ciudadanos que conforman la sociedad, en los diversos momentos de la historia. Particularmente, en Colombia, la Ley General de Educación establece como uno de sus fines “El estudio y la comprensión crítica de la cultura nacional y de la diversidad étnica y cultural del país, como fundamento de la unidad nacional y de su identidad”. En la misma ley se fijan como objetivos de la Educación Básica y Media “La adquisición de elementos de conversación y de lectura, al menos en una lengua extranjera” y “La comprensión y capacidad de expresarse en una lengua extranjera”.

“Teniendo en cuenta esta reglamentación y haciendo uso de su autonomía, la gran mayoría de las instituciones educativas colombianas ha optado por ofrecer a sus estudiantes la oportunidad de aprender el inglés como lengua extranjera. Con ello pretenden brindar un lenguaje común que permita a niños, niñas y jóvenes mayor acceso al mundo de hoy. Este hecho se ve confirmado por los datos suministrados por el Icfes respecto a las pruebas del 2004, según los cuales el noventa y nueve por ciento de los estudiantes seleccionaron el inglés en el examen de estado”5

**Razones para aprender inglés**

De acuerdo al documento del Ministerio de Educación, “Además de todas las oportunidades que se abren con el manejo de una lengua extranjera, el inglés se ha convertido en una herramienta muy importante para la educación. He aquí algunas razones por las cuales vale la pena aprenderlo:

---

4 Idem
5 Idem
• Es la lengua internacional más difundida y es un instrumento de comunicación estratégico en diversas áreas del desarrollo humano.
• Estimula al estudiante a abrir su mente, a aceptar y comprender nuevas culturas y a promover el intercambio entre diferentes sociedades
• Es muy importante que los jóvenes colombianos puedan aprovechar, en igualdad de condiciones, las oportunidades educativas que se ofrecen en el exterior y que requieren niveles de desempeño específicos en inglés.
• Ofrece mayores y mejores oportunidades laborales.
• Facilita el intercambio de conocimientos y experiencias con otros países cuya lengua oficial es diferente al inglés, porque permite la comunicación a través de un idioma común y difundido.6

SPECIFIC BACKGROUND

The community of La Candelaria School takes as purposes, the approval and generation of the social, scientific, technical, humanistic, historical and aesthetic knowledge by means of intellectual habits adapted for the competition's development. Besides its mission is to attend students from pre-school to eleven grade, diurnal and night, proceeding basically of the zone of center east of Bogotá, moreover, this institution offer an educational project emphatically in communication and living together to generate environments participative and democratic, where the educational community values its natural and cultural environment; on the other hand its vision is projected as an institution that promotes the citizens' formation with sense of belonging to its natural, historical and socio cultural environment, capable of intervening its reality.

Also is constructing collectively the curriculum which basis will be the significant construction of the knowledge through the cognitive and affective process, with emphasis in living together, communication and a projection towards the artistic

and cultural; on the other hand it promotes the integral formation that is conceived as the set of actions orientated for developing knowledge with human quality emphasizing in social responsibility.

The institution promotes the development of competent students’ holders of active and productive mind that work the knowledge, from their previous ideas and those that the environment offers. The development of competitions indicates the aptitude to learn making to play with the knowledge, transform it, abstract it, deduce it, induce it, generalize it and mean it from several patterns, using it of different ways and purposes, for such a reason this approach promotes the appropriation of knowledge.

Taking into account, The Department of National Education has formulated the National Program of Bilingualism with the aim to educate citizens capable of communicating in English, with international standards, which insert to the country in the processes of universal communication, in the global economy and in the cultural opening. This project has been defined bearing in mind the quality axes: standards, evaluation and improvement.
5. SIGNIFICANCE OF THE STUDY

Considering that fourth grade students of La Candelaria School have low English level and present major difficulty in writing skill, it is relevant to set a proposal based on cooperative learning making use of its elements through a variety of activities and guides that promote in the students teamwork and help them to start writing.

This project will contribute that through cooperative learning the students start to write, due to the fact that it makes students be more conscious of the role that they must play in their teamwork.

Furthermore, all the activities and guides given to the students are significant because they are planned on cooperative learning, in order to fulfill students’ needs. Additionally, it will support the beginning of writing in foreign language in fourth grade students of the mentioned community.
6. RESEARCH OBJECTIVES

6.1 GENERAL OBJECTIVE

- To set up a proposal where cooperative learning is used to start writing in fourth grade’s students at La Candelaria School

6.2 SPECIFIC OBJECTIVES

- To promote Positive Interdependence and Face to Face Interaction through didactic activities
- To apply some guides and activities that help students to start writing focused on cooperative learning.
7. FEASIBILITY OF THE RESEARCH

7.1 RESOURCES

- Human Resources

  26 students
  3 student teachers
  1 titular teacher

- Technical resources

  Classroom
  Guides
  Instruments
  Surveys
  Observations

7.2 LIMITATIONS

According to the problem considered in observations done and the research problem *How to make use of cooperative learning to start writing?* With the participation of fourth grade students at la Candelaria School, more specifically in 401 grades, we can assume that throughout the research many obstacles will be found and these are some of these:
• **TIME**

Time is one of the main points against of the research, although it has been planned all the activities, it is not a certain fact that time will be enough to reach and carry out all the purposes of this research.

Working with children is a hard job, because it is so difficult the attention during all class, for this reason at the moment to choose the population in which it is going to be applied the activities it has been taken into account that those students present a big difficulty in the moment that they are going to write, the most of them in this group do not produce any type of sentences in English, they are in the first step of writing which is the grapheme, they only produce words anymore.

• **ENGLISH LEVEL**

It was evidenced through observations and guides applied that fourth grade students at la Candelaria School have low English level.

• **MATERIALS**

These students do not have a text book, any kind of material or resource that can help them in their English learning process by which it makes that we as teachers have to create all the materials, activities and a program to be taken into account during the application.
8. THEORETICAL FRAMEWORK

Taking into account that cooperative learning might be a good strategy to start writing in fourth grade students of La Candelaria School, it is necessary to check some theories that are important for the development of this project.

Furthermore, it was observed that through the different class sections, students showed interest, motivation and better relationships when they worked in groups; reason why it was considered to make use of a strategy called “Cooperative Learning”, which Johnson & Johnson, in his book Cooperative learning in the classroom, (page 4) defines; “Learning is something students do, not something that is done to students. Learning is not a spectator sport. It requires students' direct and active involvement and participation. Like mountain climbers, students most easily scale the heights of learning when they are part of a cooperative team”\(^7\). Moreover, in order to evidence if students like working in groups, a survey was applied.

8.1 WHAT IS COOPERATIVE LEARNING

According to Johnson and Johnson (1982), in which “cooperative learning is the instructional use of small groups so that students work together to maximize their own and each other’s learning”\(^8\).

\(^7\) JOHNSON, David, JOHNSON, Roger and HOLUBEC, Edythe. Cooperative Learning in the Classroom. USA, 1994

Johnson & Johnson, (1989) says" Class members are organized into small groups after receiving instruction from the teacher. They then work through the assignment until all group members successfully understand and complete it. Cooperative efforts result in participants striving for mutual benefit so that all group members gain from each other's efforts (Your success benefits me and my success benefits you), recognizing that all group members share a common fate (We all sink or swim together here), knowing that one's performance is mutually caused by oneself and one's colleagues (We can not do it without you), and feeling proud and jointly celebrating when a group member is recognized for achievement (We all congratulate you on your accomplishment!).

It will be implemented across a series of guides and activities, in which will be applied characteristics mentioned above.

8.1.2 WHAT MAKES COOPERATIVE GROUPS WORK?

In (Johnson & Johnson’s theory, 1989, p.9), they talked about some points that are important at the moment that teamwork works well. For this reason, educators fool themselves if they think well-meaning directives to "work together," "cooperate," and "be a team," will be enough to create cooperative efforts among group members. Placing students in groups and telling them to work together does not in and of itself result in cooperation. Not all groups are cooperative. Sitting in groups, for example, can result in competition at close quarters or individualistic effort with talking.

In order to make that a group works well, it is necessary to structure lessons so students do in fact work cooperatively with each other requires an understanding of the components that make cooperation work.
According to Johnson and Johnson’s theory (1994) “in cooperative learning group: Students are assigned to work together and are happy to do so. They know that their success depends on the efforts of all group members. Such groups have five defining characteristics. First, the group goal of maximizing all members’ learning motivates members to roll up their sleeves and accomplish something beyond their individual abilities. Members believe that they sink or swim together and if one fails, they all fail. Second, group members hold themselves and each other accountable for doing high-quality work to achieve their mutual goals. Third, group members work face to face to produce joint products. They do real work together and promote each other’s success through helping, sharing, assisting, explaining, and encouraging. Fourth, group members are taught social skills and are expected to use them to coordinate their efforts and achieve their goals. Task work and teamwork skills are emphasized, and all members accept responsibility for providing leadership. Finally, groups analyze how effectively they are achieving their goals and how well members are working together to ensure continuous improvement of the quality of their learning and teamwork processes”

8.2 ELEMENTS OF COOPERATIVE LEARNING

8.2.1 POSITIVE INTERDEPENDENCE

In cooperative learning situations there is a positive interdependence among students’ goal attainments; students perceive that they can reach their learning goals if and only if the other students in the learning group also reach their goals.

“Positive interdependence is successfully structured when group members perceive that they are linked with each other in a way that one cannot succeed unless everyone succeeds. Group goals and tasks, therefore, must be designed

---

9 JOHNSON, David, JOHNSON, Roger and HOLUBEC, Edythe. Cooperative Learning in the Classroom. USA, 1994
and communicated to students in ways that make them believe they sink or swim together\textsuperscript{10}. In Johnson and Johnson’s theory (1994), when positive interdependence is solidly structured, it highlights that (a) each group member’s efforts are required and indispensable for group success and (b) each group member has a unique contribution to make to the joint effort because of his or her resources and/or role and task responsibilities. Doing so creates a commitment to the success of group members as well as one’s own and is the heart of cooperative learning. If there is no positive interdependence, there is no cooperation.

After explaining the academic task to students, you must create cooperation among students by structuring positive interdependence into the lesson. Positive Interdependence links students together so no single student can succeed.

There are four steps to be followed within Positive Interdependence:

\textbf{8.2.1.1 POSITIVE GOAL INTERDEPENDENCE}

Positive goal interdependence unites group members around a common goal, a concrete reason for acting. You must structure positive goal interdependence over and over again until both you and your students see it as a natural part of any lesson.

\textbf{8.2.1.2 RESOURCE INTERDEPENDENCE}

Structuring resource interdependence requires you to give each group member only a portion of the information, materials, or other items necessary to complete a task so that members have to combine their resources to achieve their goals.

\textsuperscript{10} Ibid.
8.2.1.3 ROLE INTERDEPENDENCE

You can structure role interdependence by assigning group members complementary, interconnected roles, it means, roles specify responsibility for actions; the group must undertake to complete a joint task.

8.2.1.4 IDENTIFY INTERDEPENDENCE

Identify interdependence is established when each group selects a name or group symbol. A shared identifies binds group members together.

The aspects mentioned above are evidenced and developed through the guides and activities done.

8.2.2 PROMOTIVE INTERACTION, PREFERABLY FACE-TO-FACE.

"Students need to do real work together in which they promote each other's success by sharing resources and helping, supporting, encouraging, and applauding each other's efforts to achieve. There are important cognitive activities and interpersonal dynamics that can only occur when students promote each other's learning. This includes orally explaining how to solve problems, teaching one's knowledge to others, checking for understanding, discussing concepts being learned, and connecting present with past learning."\(^\text{11}\).

Johnson and Johnson (1994), each of those activities can be structured into group task directions and procedures. Doing so helps ensure that cooperative learning groups are both an academic support system (every student has someone who is committed of helping him) and a personal support system (every student has someone who is committed to him or her)

---

\(^\text{11}\) JOHNSON, David, JOHNSON, Roger and HOLUBEC, Edythe. Cooperative Learning in the Classroom. USA, 1994
as a person). It is through promoting each other's learning face-to-face that members become personally committed to each other as well as to their mutual goals.

8.3 ASSIGNING STUDENTS TO GROUPS

According to Johnson and Johnson (1994, p.25), The teacher can decide if the groups are homogeneous or heterogeneous because each one will have access to different perspectives and methods to solve problems as: distribution at random (mathematics method, provinces and capitals, personal preferences), stratified distribution, the groups are selected by the teacher and the own students, (this one is the less recommended).

8.4 ASSESSMENT IN COOPERATIVE LEARNING

According to Johnson and Johnson (1994, p.89),” Prior to each lesson, teacher must decide on the criteria, he/she will use to evaluate student performance and plan how teacher will collect the information that need to make judgments. During the lesson, teacher assesses student learning by observing an interviewing students. Professor can not measure all learning outcomes by pencil and paper homework assignments and tests”.

8.5 “ESTANDARES CURRICULARES”

It is taken the official document of the National Education Ministry that is called “Estandares Curriculares” in foreign language; with this document is pretended to articulate a proposal in which will be taken some aspects that might help students to start writing in a creative and meaningful way.
8.5.1 Competencias en lengua extranjera: Inglés

De acuerdo al documento de los estándares básicos de competencias en lengua extranjera “La meta es que al terminar su ciclo educativo los jóvenes del país hayan alcanzado o superado el nivel en el cual puedan usar el inglés para hablar de temas no especializados, pero de su interés. Además, la enseñanza del inglés está apoyando el desarrollo de las competencias generales que conforman el potencial humano y posibilita el acceso a un mundo de pensamiento y expresión”\(^{12}\)

“Mediante la enseñanza del inglés se busca que los estudiantes:

**Utilicen el inglés para expresar sus conocimientos y para ampliarlos:** Los conocimientos que los estudiantes tengan de diversas disciplinas, de su cultura y su sociedad son parte fundamental de su ser y el inglés les permitirá expresarlos para permitir su crecimiento personal y sus aportes a la sociedad.

**Reconozcan y expresen su individualidad y crezcan como personas:** Los niños, niñas y jóvenes poseen una serie de valores, sentimientos, creencias y potencial intelectual que definen su personalidad. La imagen que ellos tienen de sí mismos y de su relación con el mundo se mira desde otra perspectiva cuando otra lengua y cultura ofrecen la oportunidad de ver opciones diferentes”\(^{13}\)

“Se interrelacionen con otros y aprendan de ellos haciendo uso de sus habilidades y conocimientos: Los estudiantes reconocerán que son parte de una comunidad distintiva y que la comunicación con sus miembros forma parte

\(^{13}\) Ibid.
esencial de su vida diaria; se espera que puedan reconocer a otras comunidades y a su cultura, y que valoren al inglés como un medio para relacionarse con sus individuos.

**Desarrollen consciencia sobre cómo aprenden la lengua materna y otras lenguas:** El estudio del inglés debe generar conciencia en los estudiantes sobre cómo son sus procesos de aprendizaje, tanto de la lengua materna como de las lenguas extranjeras. Dicha conciencia facilitará el desarrollo de las estrategias y la toma de decisiones que les permitan mejorar sus procesos de aprendizaje.

La enseñanza del inglés permitirá entonces el desarrollo de los estudiantes colombianos no sólo desde la **perspectiva lingüística** sino también como **seres humanos** que encuentren sentido al aprendizaje del inglés como una herramienta que les ayude en el proceso complejo de construir su realidad y la de la comunidad a la que pertenecen.14

### 8.5.2 Estandares en Lengua Extranjera Basica Primaria

- “Copio y transcribo palabras que comprendo y que uso con frecuencia en el salón de clase.
- Escribo el nombre de lugares y elementos que reconozco en una ilustración.
- Escribo información personal en formatos sencillos.
- Demuestro conocimiento de las estructuras básicas del inglés.
- Escribo sobre temas de mi interés
- Escribo descripciones y narraciones cortas basadas en una secuencia de ilustraciones.

14 Idem
8.6 WHAT IS WRITING?

According to the outcomes got from the guides applied in the first stage of this research and the low English level of the students, writing was the skill that presented more difficulty among them.

Murray (1985) says: “Meaning is not thought up and then written down”. The act of writing is an act of thought” (p.3). Even in this definition it is clear that “writing” is a process that can be defined as composing and expressing ideas through words, sentences and letters, something that only occurs when mental operations are mobilized for the purpose of composing and expressing ideas”.

According to the text “Young Researches” 16“Children see around them writing for all sorts of purposes and they soon begin to pick up pens and crayons to try to make messages themselves. These early attempts to write are different from children’s early drawings; cross-cultural studies indicate that their scribble shows features of the writing language in their environment. Vigotsky argues that cultural sign systems like writing have a considerable impact on intellectual development (Vigotsky, 1978). In this way, there are several studies that identify stages in learning to write. Marie Clay suggests that before children can reliably produce letters of the alphabet, some principles of their early efforts at mark-making can be detected and described. For example, the repetition of the same marks and letter information in termed by Clay “the recurring principle”; the way in which writing is orientated is the “directional principle”; and the “inventory principle” is to do with the

---

16 Young Researches. Informational Reading and Writing in the Early and Primary years.
way children start to arrange letters that have become part of their written repertory (Clay, 1975, chapter 3).

8.6.1 WRITING IS A GOOD THING

“Writing activities help to consolidate learning in the other skill areas. Balanced activities train the language and help aid memory, besides, writing activities allow for conscious development of language; lots of structure in the language appear more frequently in writing and, perhaps most important of all, when students write they have time to go back and think about what they have written”17

8.6.2 GUIDED WRITTEN ACTIVITIES

- Fill in exercises

“Fill in exercises are useful activities, especially at the beginner stages. They do not require much active production of language, since most of the language is given, but they do require understanding. Fill in exercises can be used for vocabulary work. For example, if students are familiar with the words for pets and a few adjectives, then this text has meaning even though there is no picture to put it in a context”18

8.6.3 PRE-WRITING

According to Wendy A. Scott and Lisbeth H. Ytreberg (1994, p.72), the main difficulty with writing activities since to be going from nothing to something. Even students with lots of imagination do not always know what to write about. Their vocabulary is limited. They are still not confident about the mechanics of writing. All

18 Ibid.
pupils need to spend time on pre-writing work, warm up activities which are
designed to give them language, ideas and encouragement before they settle
down to the writing itself.

8.6.4 TOPIC VOCABULARY

According to Wendy A. Scott and Lisbeth H. Ytreberg (1994, p.76), a short simple
conversation about the subject can be enough to get ideas going and collect
thoughts. With the five to seven years olds, teacher starts them off by simply
asking a question: “what did you do last night?” and writing some of the answer on
the board: Watched tv, played football, read a story etc.

“Vocabulary can also build up by collecting related words. For example, see how
many animal words you can get on the blackboard, say to students: “tell me the
animals you like, tell me the animals you do not like, what is the smallest animal
you have seen? Etc. Of course, pupils will not know the names or all the animals. It
is used picture dictionaries as much as they can. Students do not have to
remember all this words they are only collecting words to help them to write”19.

8.6.5 DIALOGUES

children write as basic communication at all levels if they are spoken before they
are reading and using as reading text after they have been reading. The dialogues
can be guided, following a very strict pattern, or they can be completely free. They
can be very short and to the point.

8.6.6 SUMMARY OF DOS ON WRITING

- “Concentrate first on content
- Spend time on pre-writing work
- Make sure that it springs naturally for other language work.
- Try to make sense of whatever the students have written and say something positive about it.
- Encourage, but do not insist on re-writing
- Display the material whenever possible”

8.6.7 REINFORCEMENT

“Some students acquire languages in a purely oral/aural way, but most of the people benefit greatly from seeing the language written down. The visual demonstration of language construction is invaluable for both the understanding of how it all fits together and as an aid to committing the new language to memory. Students often find it useful to write sentences using new language shortly after they have studied”

8.7 DEFINITION OF BASIC CONCEPTS

COOPERATIVE LEARNING

“Cooperation is working together to accomplish shared goals. Within cooperative situations, individuals seek outcomes beneficial to themselves and all other group members. Cooperative learning is the instructional use of small groups through which students work together to maximize their own and each other’s learning.”

---

20 Ibid.
22 JOHNSON, David, JOHNSON, Roger and HOLUBEC, Edythe. Cooperative Learning in the Classroom. USA, 1994
POSITIVE INTERDEPENDENCE

According to Positive Interdependence, “teachers must structure learning tasks so that students come to believe that they sink or swim together that is, their access to rewards is as a member of an academic team wherein all members receive a reward or no member does. Essentially, tasks are structured so that students must depend upon one another for their personal, teammates', and group's success in completing the assigned tasks and mastering the targeted content and skills”\(^{23}\).

FACE-TO-FACE INTERACTION

“Students need to do real work together in which they promote each other's success by sharing resources and helping, supporting, encouraging, and applauding each other's efforts to achieve. There are important cognitive activities and interpersonal dynamics that can only occur when students promote each other's learning. This includes orally explaining how to solve problems, teaching one's knowledge to others, checking for understanding, discussing concepts being learned, and connecting present with past learning. Each of those activities can be structured into group task directions and procedures. Doing so helps ensure that cooperative learning groups are both an academic support system (every student has someone who is committed to helping him or her learn) and a personal support system (every student has someone who is committed to him or her as a person). It is through promoting each other's learning face-to-face that members become personally committed to each other as well as to their mutual goals”\(^{24}\).

\(^{24}\) Available from the World Wide Web: http://www.co-operation.org/pages/cl.html#interaction
Murray (1985) says: “Meaning is not thought up and then written down”. The act of writing is an act of thought” (p.3). Even in this definition it is clear that “writing” is a process that can be defined as composing and expressing ideas through words, sentences and letters, something that only occurs when mental operations are mobilized for the purpose of composing and expressing ideas”.

WRITING
9. METHODOLOGICAL FRAMEWORK

This research is developed in three stages described in the chart below:

<table>
<thead>
<tr>
<th>STAGES</th>
<th>OBJECTIVES</th>
<th>TOOLS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student context</td>
<td>To make a diagnostic about what do they like? What they do not like, hobbies, to know about their families, what they do in their free times, favourite games and TV programs.</td>
<td>• Talking in the classroom.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Survey on what do they like? What they do not like, family etc.</td>
</tr>
<tr>
<td>Student knowledge</td>
<td>To identify the students English level by means of tests and guides in which are evaluated the four skills. Besides, it is done a survey with the goal to know if they like working</td>
<td>• Test in which is evaluated the four skills.</td>

</tr>
<tr>
<td></td>
<td></td>
<td>• Survey on working in groups</td>
</tr>
</tbody>
</table>
Cooperative learning and writing

To apply guides, games, activities focus on cooperative learning with the purpose of starting the writing process in those students.

• Pedagogical guides focus on cooperative learning

Assessment

To review and assess the learning process after the application of each pedagogical guide.

• Observation
• Review at the end of each guide and activity.

9.1 TYPE OF RESEARCH

This research was based and developed on action research theories because:

Action research is a process in which participants examine their own educational practice systematically and carefully using the techniques of research. It is based on the following assumptions:

• Teachers and principals work best on problems they have identified for themselves.

• Teacher and principals become more effective when encouraged to examine and assess their own work and then consider ways of working differently.
• Teacher and principals help each other by working collaboratively.

• Working with colleagues helps teachers and principals in their professional development\textsuperscript{25}

Research and reflection allow teachers to grow and gain confidence in their work. Action research projects influence thinking skills, sense of efficacy, willingness to share and communicate, and attitudes toward the process of change. Through action research, teachers learn about themselves, their students, their colleagues, and can determine ways to continually improve\textsuperscript{26}.

Based on the above and taking into account the relevant issues handled in our program, the following chart are the descriptors given to the four stages:

<table>
<thead>
<tr>
<th>STAGES</th>
<th>PROCEDURE</th>
<th>RESULTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student context</td>
<td><strong>Observation:</strong> during the first week of class, it was done the presentation of the teachers in the school, besides, it was done a kind a dialogue with students in where was pretended to know better to students, to</td>

</tr>
</tbody>
</table>
encouraged agent for them when they did all the tasks, games and activities proposed. However, it was noticed that some students have some problems with their teamworks, this way; it was implemented strategies to overcome that difficulties.

**Planning:** it was designed all the pedagogical guides, activities and games, making use of cooperative learning to start the writing process in those students.

**Implementation:** it was given and applied all the guides and activities were applied, it was noticed that students did a good efforts at the moment to developed those activities. However, some students had some problems with their teamworks for this reason, some of them were changed to others teamworks.
which purpose was to make use of the cooperative learning to start the writing process in those students.

| Assessment | Observation: Students were assessed by mean of observation during the application of the activities and guides, besides at the end of each guide was done a point in which the vocabulary and topics are reviewed. |
| Planning: | Observation of students’ performance, also, to do a reviewing about the topics seen in each class. |
| Implementation: | It was difficult for them the development of the activities and guides because of its English level, however they enjoyed and had some fun at the moment to work in groups. |
9.2 POPULATION

9.2.1 School context

This public institution was created from the resolution No. 2352 of August 14 2002; this educative institution is located in the street number 2a No. 17-55 in “la Candelaria” neighbourhood in the locality 17; this is the official institute, submitted to laws, decrees, agreements, resolutions and supported with funds of the public exchequer.

It has approximately a population of 2100 students, formal education, enrolled in school education, diurnal and night in a continuous and articulated in three degrees levels:

- Pre-school education
- Elementary
- High school

The school population of the institution belongs to the basic status 1 and 2 of the city vulnerable zones; this research will be applied on a group of 26 students, it is conformed by 12 boys and 14 girls who range in an age from 9 to 11 years old. The IED La Candelaria School counts with library, photocopies machine, a projector and computers room, tape recorders, sport’s elements and musical elements.
9.3 TIME LINE

9.3.1 STUDENT CONTEXT

- **OBJECTIVE:** To make a diagnostic about what do they like? What they do not like, hobbies, to know about their families, what they do in their free times, favourite games and TV programs.

- **LENGTH:** One week

- **INSTRUMENT TO GATHER INFORMATION:** Survey

- **RESULTS:** The results of the survey did show that: they like watch TV and listen to music, the kind of music that they prefer is reggaeton and his/her singer favourite is Daddy Yankee, besides, they like reading, his/her favourite subject is mathematics, his/her favourite sport is football and basketball, finally, his/her favourite food is fast food.

9.3.2 STUDENT KNOWLEDGE

- **OBJECTIVE:** To identify the students English level by means of tests and guides in which are evaluated the four skills. Besides, it is done a survey with the goal to know if they like working in groups.

- **LENGTH:** 3 weeks

- **INSTRUMENT TO GATHER INFORMATION:** Guides

- **RESULTS:** it was evidenced that they have a low English level, and the skill where they presented more difficulties was writing, for this reason, it was considered take into account to make use of a strategy that is called Cooperative learning to start a writing process with those students.

9.3.3 COOPERATIVE LEARNING AND WRITING

- **OBJECTIVE:** To apply guides, games, activities focus on cooperative learning with the purpose of starting the writing process in those students.

- **LENGTH:** 8 weeks
- **INSTRUMENT TO GATHER INFORMATION:** Guides and activities

- **RESULTS:** The results showed that students were motivated at the moment to form teamworks, besides, they had positive expectatives about what they had to do, moreover, when the guides and activities that were applied, it was noticed that students did a good efforts at the moment to developed those activities. However, some students had some problems with their teamworks for this reason, some of them were changed to others teamworks.

- **9.3.4 ASSESSMENT**

  - **OBJECTIVE:** To review and assess the learning process after the application of each pedagogical guide.

  - **INSTRUMENT TO GATHER INFORMATION:** OBSERVATION FORMAT

  - **RESULTS:** It was difficult for them the development of the activities and guides because of its English level, however they enjoyed and had some fun at the moment to work in groups, it was positive the use of cooperative learning to start the writing.
10. DATA ANALYSIS SURVEYS

According to the survey done, this graphic shows that the 46% of fourth grade students of la Candelaria School, prefer to watch TV in their free time, the 31% prefer listening to music, the 15% to read and 8% doing other activities.

This graphic shows that 65% of the students prefer to watch Los Simpson’s program, 19% prefer to watch Bichos Biches, 12% Club 10 and 4% other programs.
According to what kind of music students prefer, the 73% prefer listening reggaeton music, 23% prefer another kind of music, 4% Hip-Hop music and 0% listen pop music.

For the 69% of the students the favourite group is Daddy Yankee, for the 23% is RBD, the 8% prefer other groups and the 0% like Panda group.
According to what kind of reading students prefer, the graphic shows that 45% of them prefer stories, 31% prefer cartoons, 12% prefer books, and the other 12% prefer other kind of reading.

For the 51% of the students, math is their favourite subject, 19% prefer Spanish, 15% prefer English and the other 15% prefer other subjects.
According to the question, what is your favourite sport, 50% of students answered football, 46% answered basketball, 4% volleyball and 0% others.

For the 54% of the students fast food is their favourite food, 27% prefer typical food, 19% prefer soups and 0% others.
SURVEY 2

According to the survey done, the graphic shows that the 88% of fourth grade students at la Candelaria School like working in groups.

For the 77% of the students is more important to work in groups that 23% of the students.
For the 92% of the students to work in groups is something that they value more than working alone.

The 77% of fourth grade students of la Candelaria School, believe that they learn more that when they work alone.
This graphic shows that the 92% of students prefer to select their classmates when they have to work in groups, while for the 8% of students it doesn’t a problem.

The 62% of students prefer to work in small groups while the 38% prefer to work in big groups.
The 50% of students have medium level of participation, 42% high level and 8% low level.
CONCLUSIONS

According to data analysis and the observed during the whole research the following points were concluded:

- It was shown that cooperative learning might be a good strategy to start the writing process in fourth grade students at La Candelaria School.

- The implementation of Cooperative Learning allows students to overcome some problems when they work in group, getting better interaction with others, and working towards a common aim.

- Positive Interdependence and Face to Face Interaction are essential elements to promote better relationships and help students to be conscious about the real meaning of working in a team.
SUGGESTIONS

During the research process, there were presented some problems that were preventing from reaching the goals of the project, one of these troubles was the lack of time, it is though that there is not enough time to develop a complete study on a problem, for this reason it is believed that a research project must be carried out from the first semesters to develop a whole study of the project of research, consequently, to articulate a proposal to give possible solutions.

ANNEXES
Lee y responde cuidadosamente las siguientes preguntas:

1- Escribe tu nombre completo

_______________________________________________________________

2- ¿Cuántos años tienes?

_______________________________________________________________

3- ¿En que barrió vives?

_______________________________________________________________

4- ¿Con quien vives?

_______________________________________________________________

5- ¿Cuántos hermanos tienes?

_______________________________________________________________

6- ¿Qué te gusta hacer en tu tiempo libre?
   a- Ver televisión
   b- Escuchar música
   c- Leer
   d- Otro

7- ¿Con quien te gusta compartir tu tiempo libre?
   a- Padres
   b- Hermanos
   c- Amigos
   d- Otro
8- ¿Cuál es tu programa de televisión favorito?
   a- Los Simpson
   b- Bichos Biches
   c- Club 10
   d- Otro

9- ¿Qué clase de música te gusta?
   a- Reggaeton
   b- Hip-Hop
   c- Pop
   d- Otro

10-¿Cuál es tu grupo favorito?
   a- RBD
   b- Panda
   c- Daddy Yankee
   d- Otro

11-¿Qué te gusta leer?
   a- Libros
   b- Historietas
   c- Cuentos
   d- Otro

12-¿Cuál es tu materia favorita?
   a- Inglés
   b- Español
   c- Matemáticas
   d- Otro

13-¿Cuál es tu deporte favorito?
   a- Football
   b- Volleyball
   c- Matemáticas
   d- Otro
14- ¿Cuál es tu comida favorita?

a- Comidas rápidas
b- Sopas
c- Almuerzo tradicional
d- Otro

_________ ________ ________ ________ ________ ________
JUSTIFICATION

This program is designed for starting the writing process through cooperative learning applying a variety of activities and guides, in which students could establish better relation with the others, promote student learning and academic achievements. Moreover these activities done will be developed based on positive interdependence and face to face interaction; so that students must know that their role is very important in the success of their group and the responsibilities among them, on the other hand students need to work jointly in which they could support the success of the other members and show an appreciation of each other’s efforts in order to reach common aims.

GENERAL OBJECTIVE

- To do activities and guides to make use of cooperative learning in order to start student’s writing process.

SPECIFIC OBJECTIVES

- To take the elements of cooperative learning for promoting better relationships among students.
- To be able of writing short simple sentences.

CONTENTS

1. Colors
2. Countries
3. Greetings and introductions
4. Describing people
5. Animals
6. Means of transport
7. Fruits
METHODOLOGY

• To conform groups according to the abilities that each student has.
• Assignment of tasks and roles for each group.
• To develop activities in which students could learn from the others and give their ideas to teamwork for getting better results.
• To do an assessment at the end of each activity.

ASSESSMENT

The assessment will be carried out through the observation of student’s performance, checking the concepts for gathering information in order to give an opinion about students process.

RESOURCES

• Guides
• Activities

Namaes:

AIMS:
• Students are able to describe people, using the expressions seen in class.
• Improve the interaction among students in order to create a nice environment in class.

ACTIVITY
Group of three people

DESCRIBING PEOPLE

WORD LIST

EXPRESSIONS: I AM...
. Describe the following pictures: (20 points)

- Student 1 has to write the correct adjective in front of each picture.
- Student 2 has to look up the unknown words in the dictionary.
- Student 3 has to write short sentences using the adjectives.

Example:

I am happy.
I am sad.
GUESSING

One member of the teamwork has to pass in front of the class; he/she has to choose one adjective to act, in this way, the other partners can guess which adjective is. The group has two opportunities to guess if they do not know the next group will have the chance to guess it. (20 points)

- Write the adjectives in the chart.

</table>
ANIMALS
ACTIVITY: group of three people
AIMS

• Students will be able to write the name of each animal and identify which are the farm animals and domestic animals.
• To promote positive interdependence during the activity.

WORD LIST!

LET'S START!

1- In a big piece of paper each student has to make a poster about animals, teacher will say the name of an animal and students have to draw and write the corresponding name of each one. (20 points)

• Student 1 has to draw what he/she listen about.
• Student 2 has to look up in the dictionary for helping his/her partner to write in a correct way each word
• Student 3 has to write the corresponding name

- Rabbit
- Bear
- Turtle
- Hen
- Dog
- Cat
- Horse

- Duck
- Cow
- Pig
- Sheep

2- Write a short dialogue with your partners, you have to imagine that you are an animal, remember the greetings studied. (20 points)

Example:

I am a dog!
Who are you?
I am a rabbit!
How are you?...

<table>
<thead>
<tr>
<th>STUDENT 1</th>
<th>STUDENT 2</th>
<th>STUDENT 3</th>
</tr>
</thead>
</table>

3- Identify the farm and domestic animals and put them into the box. (20 points)

• Student 1 has to identify which are the farm and domestic animals
• Student 2 has to write down into the box each one.
• Student 3 has to pass to the board and write two domestic animals and two farm animals.

- Rabbit
- Bear
- Turtle
- Hen
- Dog
- Horse

- Cat
- Duck
- Cow
- Pig
- Sheep
FARM ANIMALS | DOMESTIC ANIMALS
--- | ---

In order to reinforce this vocabulary, students will listen to a song called “Old MacDonald had a farm”, and write down the animals they listen.

**Old Macdonald Had A Farm**

Old Macdonald had a farm ee-eye, ee-eye oh
And on that farm he had a duck
   Ee-eye, ee-eye, oh
With a quack, quack here
And a quack, quack there
   Here a quack
   There a quack
Everywhere a quack, quack
Old Macdonald had a farm ee-eye, ee-eye oh

Old Macdonald had a farm ee-eye, ee-eye oh
And on that farm he had a cow
   Ee-eye, ee-eye oh
With a moo, moo here
And a moo, moo there

Here a moo
There a moo
Everywhere a moo, moo
Quack, quack here
And a quack, quack there
   Here a quack
   There a quack
Everywhere a quack, quack
Old Macdonald had a farm ee-eye, ee-eye oh

Old Macdonald had a farm ee-eye, ee-eye oh
And on that farm he had a dog
   Ee-eye, ee-eye oh
With a woof, woof here
And a woof, woof there
   Here a woof
   There a woof
Everywhere a woof, woof
Moo, moo here
And a moo, moo there
  Here a moo
  There a moo
Everywhere a moo, moo
Quack, quack here
And a quack, quack there
  Here a quack
  There a quack
Everywhere a quack, quack

Old Macdonald had a farm ee-eye,
  ee-eye oh

Old Macdonald had a farm ee-eye,
  ee-eye oh
And on that farm he had a pig
  Ee-eye, ee-eye oh
With an oink, oink here
And an oink, oink there
  Here an oink
  There an oink
Everywhere an oink, oink
Woof, woof here
And a woof, woof there
  Here a woof
  There a woof
Everywhere a woof, woof
Moo, moo here
And a moo, moo there
  Here a moo
  There a moo
Everywhere a moo, moo
Quack, quack here
And a quack, quack there
  Here a quack
  There a quack
Everywhere a quack, quack
Old Macdonald had a farm ee-eye,

LETTUCE                 APPLE                 ORANGE                   STRAWBERRY
BANANA                     GRAPES             PEAR                 TANGERIN
LET'S START!

1- Students have to classify and write into each box which is the vegetables, fruits and others. (20 points)

- Student 1 has to write into the box the vegetables
- Student 2 has to write into the box the fruits
- Student 3 has to write another kind of food.

<table>
<thead>
<tr>
<th>VEGETABLES</th>
<th>FRUITS</th>
<th>OTHERS</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.1 When you finish tell to your partners what you have done, then you have to do the same on the board, look up in the dictionary and try to find more words for each category, if you do it in the less possible time the group will have a point.

2- With the help of your teamwork, match and complete, remember! You are competing for this. (20 points)
Student 1 has to fill the gaps

S__e__
_ r__
__ s
C__
_e__c_
P__
_p_l_
S__h
_u__m__
B__a_

While your partner is filling the gaps student 2 has to look up in the dictionary other fruits and put the new words into the box.

<table>
<thead>
<tr>
<th>VEGETABLES</th>
<th>FRUITS</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Student 3 has to help his/her teammates in order to finish as soon as possible this point.
Each teamwork has to arm the jigsaw and the group that finish first will have an extra point. (20 points)

**LET'S CHECK!**

Each teamwork has to write into the circles other fruits and vegetables, different to the word list.
